CLIMATE CHANGE MEETING 19/5/08

Some interesting facts:

Current average carbon footprint = 12 tonnes
Target = 2 tonnes

LUTON PRODUCES

56,000 tonnes of greenhouse gas emissions pa
52,000 tonnes of CO2 pa

Airport responsible for 100,500 tonnes of CO2 pa

Sandra Carroll and Steve Lawson are Luton's GREEN CHAMPIONS

A typical household uses 4000 Kwh of electricity.

We were asked to find out

How much electricity we each used in a year(2007). My figure was 3303 Kwh	
How much it cost	£355-33
How much gas used in the year	10507 Kwh
Cost	£356-72
How much Mains water	47 cubic metres @ £67-94
How much sewage	42.30 cubic metres @£92-94

Luton BC's comparable figures (06-07) were:

Electricity	cost £1,251,370-65 (net) for 19,239,815Kwh
Gas	£1,214,495-07 46,834,035Kwh
Water	£291,191-75 291,128 cubic metres

What are your comparable figures?

How do Bedford, Mid- and South-Beds compare?

And the County?

Tony Mitchell 18/7/08
